HUMMING-PROP MULTI-ROTOR TARGET DRONE

The **HUMMING-PROP** is a multi-rotor target drone for artillery and anti-drone systems.

The **HUMMING-PROP** has been designed and manufactured using high specification components under strict quality controls. The result is a very reliable, robust, high-performance multirotor target drone that can operate in adverse environmental conditions. Its

electronic management-system increases its flight range and ease of maintenance.

The operation control of the **HUMMING-PROP** is performed from a Tablet PC, operating both in manual mode and on automatic flights. The system admits a wide range of payloads, making the **HUMMING-PROP** a very versatile multi-rotor. The system is especially useful in artillery exercises and for operations with anti-drone solutions.

TECHNICAL INFO

DIAMETER:	1,500 mm
HEIGHT:	500 mm
MTOW:	6 kg
PAYLOAD:	2 kg
MAX. ALTITUDE:	900 m
MAX. SPEED:	15-20 km/h
RANGE:	10 km
ENDURANCE:	40 min
